FROM SUMMER CREWS TO WINTER BLUES

WINTER WATCH SERVICE

Your pool is a significant investment. Much like your house or a car it requires routine maintenance and inspections. Be proactive to minimize the risk of downtime and reduce operating costs.

Protect your cover from the added weight of leaves and water by allowing us to clean it for you. Reduce the amount of damages caused by winter, before you're ready to use the pool. Safeguard your property with an ounce of prevention, saving you time and money during your opening.

Enjoy peace of mind knowing a professional is on WATCH when you are unable to be there.

WINTER WATCH SERVICE includes 3 stops throughout the winter. You can add more stops at a discounted rate.

WINTER WATCH PACKAGE INCLUDES:

- Assess and adjust water* levels below tile line to prevent damage
- Test and add chemicals as necessary
- Remove excess water, leaves, or snow from the cover within reason
- Survey cover for holes or tears
- Appraise the integrity of the Safety Cover
- Inspect springs and/or anchors for damage and proper tension
- Replace damaged water bags
- Repair or replace parts** as needed
- Survey perimeter fencing for holes or gaps
- Secure latches, fences, or gates
- Dispose of deceased rodents
- Inspect pump room for rodent nesting
- Receive a WINTER WATCH Report summarizing our visit and alerting you of potential issues

For maximum pool operation efficiency add the Winter Warm Up!

WINTER WARM UP PACKAGES

Did you have a problem during the season with a heater, pump, filter, or salt generator/chemical feeder? Damage to your equipment can occur over time from rodents, seasonal operation, and weather conditions.

Mechanical parts do fail. Summer season repairs can be costly and unexpected downtime can ruin parties and planned events. Don't lose valuable swim days by having your equipment inoperable.

Extend the life of your pool mechanics by improving efficiency and reducing your down time during the season. All winter services include a Diagnostic Report that will include an estimated product life expectancy. This will aid owners in forecasting costs for replacing units.

You can minimize these risks and surprises by signing up for our Winter Warm Up Service Package.

Why wait for something to break down when you want to relax poolside?

WINTER WARM UP - FULL SERVICE (Recommended)

HEATER RECONDITION - Dismantle and reassemble the heater. Check, clean, and readjust the flu stack, bypass, burner tray, cabinets, firewalls, & chambers. Replace gaskets to prevent leaks. Assess heat exchanger for wear or corrosion. Install pest prevention.

PUMP RECONDITION - Start up the motor to check bearings and listen for any imperfections. Remove motor to inspect impeller for damage or debris. Replace gaskets that can break down from wear. Foam and seal impeller housing if applicable.

FILTER RECONDITION - Inspect filter tanks for corrosion or damages. Remove top layer of media and debris. Refill media as needed. Replace gaskets that can break down from wear. Test pressure gauge and replace if necessary.

SALT GENERATOR/CHEMICAL FEEDER RECONDITION - Inspect Salt Generator cell for wear or corrosion. Acid wash Salt Generator cell. Turn on Chemical Feeder pump to ensure proper operation. Replace feeder tube. Remove, inspect and acid wash all injector fittings. Insure proper operation of valves.

PLUMBING INSPECTION - Inspect plumbing for sags, wear, or cracks. Advise client of the need for any repairs.

WINTER WARM UP - MINIMUM SERVICE

HEATER RECONDITION - Dismantle and reassemble the heater. Check, clean, and readjust the flu stack, bypass, burner tray, cabinets, firewalls, & chambers. Replace gaskets to prevent leaks. Assess heat exchange (if necessary, remove from premises to acid wash for an additional charge). Install pest prevention.

PUMP INSPECTION - Start up the motor to check bearings and listen for any imperfections.

FILTER INSPECTION - Inspect filter tanks for corrosion or damages.

SALT GENERATOR/CHEMICAL FEEDER INSPECTION - Inspect Salt Generator cell for wear or corrosion. Turn on Chemical Feeder pump to ensure proper operation.

PLUMBING INSPECTION - Inspect plumbing for sags, wear, or cracks. Advise client of the need for any repairs.

+

All packages include repairing and replacing parts as needed. Parts will be billed separately unless included in the package.

AUTO CLEANER TUNE-UP

Your Auto Pool Cleaner got a work out over the summer. Let us pick it up from you, bring it to our workshop, tune it up and deliver it back to you all in time for your next opening season. This tune-up includes: disassembling the unit, check the moving parts like bearings, wheels and belts for wear and tear, inspect hose and nozzles for holes and cracks, clean out the bag and assess for any damages. After the inspection process is complete and repairs are made, parts will be replaced as needed.
